

Brotherly Love: Icky Itch

If you were a power mad witch with limited social skills and not much between the ears, and you found out you had a brother that could help you gain that power in some way, what would you do? I know what Icky, who is such a witch, tries to do. That is why I've written it all down so anyone else who would like to know can read for themselves. It involves spells, potions, a cat, a queen, a letter, lots of lying and scheming stealing and cheating, spiders, a warlock, goblins, Leprechauns, basket ball skills, hiding, sneaking around in the dark, spying, insults, an enchanted forest, old people, young people, some very bad habits, some demolition even, first aid, happiness, sadness, joy, a laugh here and there - I hope, discusting bits, nice bits, some good broom flying, some not so good broom flying, wisdom and tears, oh and a bogey, but not all in that order, but I also hope all topped off with an outcome that you yourselves would hope to expect. Lastly, sorry if I've missed anything out, but if I have I'm sure you will spot what it is should you want to read such a story as this?
